

VERY

I-Beam Tall table

The iconic central beam of this sturdy table is a direct visual reference to the steel beams used in the construction of skyscrapers. Besides the fact that it also forms the structural backbone for this modular table, it provides easy accessible storage, cable management and power point access.

Material

Baubuche top or MDF top with nanotech HPL, steel frame.

Sizes

Standard length of 180 or 240 cm. Custom length can be extended from 180 cm with 30 cm increments.

Remark

Leg position can be varied in 30 cm steps.

Option

Custom sizes and finishes possible upon request.
